

Steven Lewis Cordero

Courses Taught (Four semesters prior to current visit):

Design I + II

Design 3 + 4

Design Visualization

Educational Credentials:

Bachelor's of Science in Architecture : UTSA School of Architecture 2005

Master's of Architecture : UTSA School of Architecture 2007

Teaching Experience:

In a 1st and 2nd Year studio a main focus of mine is to demonstrate and organize studio exercises and projects in a way that students learn the process of design. Employing students to engage through sketching/ drawing, physical model making and verbal presentations seamlessly promotes a consistent practice of design. Teaching Design Visualization is also a highlight in that it opens students up to the importance of drawings, graphics, rendering, visualizing, and sketching. The demonstrations and techniques I use in Design Visualization are threads I consistently expand upon in subsequent design studios. Showing students parallels in learning to draw/ visualize is always beneficial to "drawing" and modeling digitally in 3rd and 4th Year design studios. Courses taught range from Foundation 1st and 2nd studios up to Arc 4156 Design Studios.

Professional Experience:

Since graduating in 2007 with a Master's Degree in Architecture in addition to teaching since 2011 I have worked for various sized architecture firms here in San Antonio. Early on with Poteet Architects and Alamo Architects later with Raba- Kistner Engineering. All giving valuable insight into the profession and how I approach architecture and a design studio.

Licenses/Registration:

Selected Publications and Recent Research:

Professional Memberships:

Co-Faculty Advisor for UTSA Chapter of AIAS.
